'Biostratigraphy
May 4th, 2020 - Biostratigraphy is the
branch of stratigraphy which focuses on
correlating and assigning relative ages of
rock strata by using the fossil assemblages
contained within them The primary objective
of biostratigraphy is correlation
demonstrating that a particular horizon in
one geological section represents the same
period of time as another horizon at a
different section'

'*SECOND EDITION archaeology ru*
May 3rd, 2020 - agreed Given the success of
the book a new edition seemed warranted
particularly as it is the only textbook
devoted entirely to the concepts of
stratigraphy in archaeology In considering
a revised edition it was decided to keep
the book as small as possible in order that
it would remain accessible to students of
archaeology'

'Types of stratigraphy

May 4th, 2020 - Stratigraphy is the modern day concept of studying about the layers

strata which were deposited with time
Depending on how the layers are deposited
on the ground archaeologists study the
history and civilisation of people who
lived during that era The concept of
stratigraphy is based on a law called the
law of superposition where it is said that
the layers which were deposited at the'
