### ***neurolinguistics***

*June 3rd, 2020 -*

*neurolinguistics is the  
study of the neural  
mechanisms in the human  
brain that control the  
prehension production and  
acquisition of language as  
an interdisciplinary field  
neurolinguistics draws  
methods and theories from  
fields such as neuroscience  
linguistics cognitive  
science munication  
disorders and  
neuropsychology  
researchers are drawn to  
the field from a variety of  
backgrounds'*
