difference between differentiation and integration

June 5th, 2020 - differentiation and integration are two building blocks of calculus differential calculus and integral calculus are just the opposite of each other differential calculus is basically dealing with the process of dividing something to get track of the changes on the other hand integral calculus adds all the pieces together''4 1 differentiation and integration of vector valued
June 4th, 2020 - 4 1 differentiation and integration of vector valued functions integration of vector valued functions we define the integral of a vector valued function as the integral of each ponent this definition holds for both definite and indefinite integrals example pageindex 3''session 6 calculating derivatives part a definition
