June 4th, 2020 - a four dimensional space or 4d space is a mathematical extension of the concept of three dimensional or 3d space three dimensional space is the simplest possible abstraction of the observation that one only needs three numbers called dimensions to describe the sizes or locations of objects in the everyday world for example the volume of a rectangular box is found by measuring its length width and height the idea of adding a fourth dimension began with jean le rond d alembert with his di"the view from space general observing and astronomy

May 19th, 2020 - therefore the contrast of the object against the background might be a bit better from space but the

brightness would be lower mathematically if you moved half way to the object it would be no brighter because though the object would now be 4x brighter overall inverse square law it would subtend 4x the size making it 1.4 as bright'

'making a split view in model space autocad autodesk

May 30th, 2020 - whether you are working in large drawings or simply have a need to be zoomed in to more than one location at a time one approach is to split the model space views for those of us who use civil 3d or work in autocad 3d we sometimes split the view to take a look at the 3d model while we work on the 2d plan and profile let s explore how to split our views in model space'
