OPTIMIZATION University of Cambridge

December 14th, 2019 - A linear function as in LP is both concave and convex and so all local optima of a linear objective function are also global optima 1 5 Extreme points and optimality Notice that in problem P the optimum of $c^T x$ occurs at a 'corner' of the feasible set regardless of what is the linear objective function In our case $c^T = [1 \ 1]$ and the'
