*'human geographies of climate  
change landscape*

*May 22nd, 2020 - in this paper  
we bring together work on  
landscape temporality and lay  
knowledges to propose new ways  
of understanding climate change  
a focus on the familiar  
landscapes of everyday life  
offers an opportunity to  
examine how climate change  
could be researched as a  
relational phenomenon  
understood on a local level  
with distinctive spatialities  
and temporalities'*

**'women in climate change**

**May 22nd, 2020 - the  
contributions of women in  
climate change have received  
increasing attention in the  
early 21st century feedback  
from women and the issues faced  
by women have been described as  
imperative by the united  
nations and critical by the  
population reference bureau a  
report by the world health  
organization concluded that  
incorporating gender based  
analysis would provide more  
effective climate'**
